

Normalerweise **wird der Hersteller von Sicherheitsnetzen in Visornets** regelmäßig in standardisierten Größen nach Markt oder Kunde geliefert, immer in quadratischen oder rechteckigen Größen. But what it happens if a customer need a specific safety net for a particular solution where the net is not square or rectangle? Well, no problem at all at Visornets, we do have a fully experienced engineer department and experienced netmakers as well, so we can make it real any drawing you need for your Project as so special as it will be.

Let's see one of the latest special Project: A customer came to us asking if is possible to make a safety net with a very special shape, because they have to install it for protecting the fall people and debris in maintenance labours inside a big rated hotel. The solution with netting had to protect the worker and the hotel clients because the net will have to be just up in the lobby.

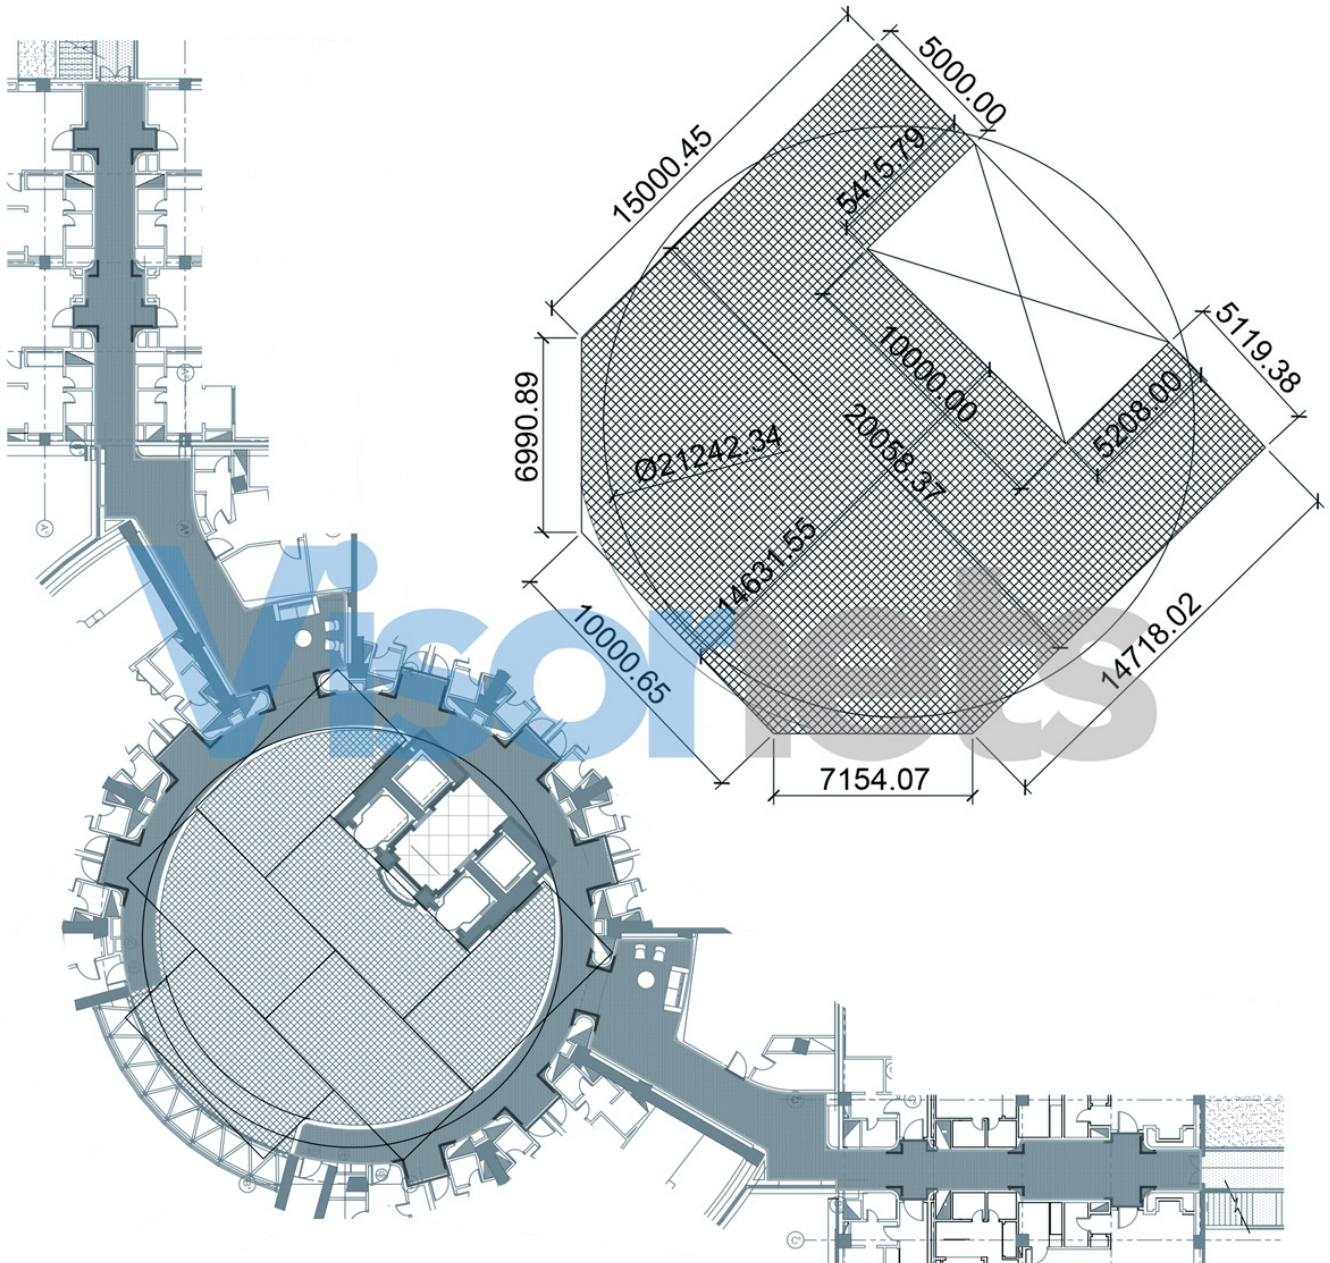

Safety net Type S - Special shape

As a result our customer gave us congratulations. They said: "The nets fix like a glove".
